# INITIATOR KIT

# INITIATOR KIT

## Description

The BDL Systems Limited Initiator Kit is a lightweight and compact system which provides the field operator with complete flexibility in the storage and transportation of initiators.

The kit is designed to meet the toughest of environments and the internal furniture ensures complete protection of the stored items.

Kits can be tailored to specific customer needs and can accommodate a combination of Shrike and Mini-Shrike hard wired exploders, PED 100 Time Delay Fuses and Radio Controlled Initiators. (Mini-R.A.B.S., RS68 etc)

A backpack version is available which can incorporate NATO firing cable on a fixed or detachable reel.

The initiator kits can be supplied in NATO type transport cases ensuring a high level of protection while being deployed.

BDL can justifiably claim to be the **Global** lead supplier of Initiator and Exploder products, having exported to Defence and Security Sectors in over 60 countries worldwide during the company's thirty year history. The company operates a Quality Management System that has been assessed to BS EN ISO9901 (BS5750-Part 1).
